

Soumya Ranjan Negi

Software Development Engineer in Test (SDET)

Bhubaneswar, Odisha — soumyanegi21@gmail.com — 7853951411 — [LinkedIn](#)

Professional Summary

SDET with nearly 4+ years of experience in designing and implementing scalable automation frameworks across fintech and healthcare domains. Strong expertise in UI, API, and database testing with hands-on experience in Playwright, Selenium, and CI/CD pipelines on AWS. Recently, I have worked with AI-powered tools (Claude AI) to generate test cases, optimize test coverage, and assist in automation script development, improving overall testing efficiency and productivity.

Technical Skills

Automation: Selenium WebDriver, Playwright, Cypress, TestNG, JUnit

Programming: Java, TypeScript, JavaScript, SQL

API Testing: REST Assured, Postman, API Automation

Database: MySQL (Joins, Data Validation, SQL Queries)

DevOps: AWS, CI/CD Pipelines, Git

Tools: Jira, Confluence, Datadog

AI Tools: Claude AI, AI-assisted Test Case Generation, AI-based Code Assistance

Testing Types: UI Testing, API Testing, Backend Testing, End-to-End Testing, Regression Testing

Professional Experience

Mindfire Digital Solutions

Mar 2024 – Present

Senior Software Test Engineer

- Designed and implemented a scalable UI automation framework using **Playwright (TypeScript)**, improving execution speed and maintainability
- Automated end-to-end healthcare workflows covering UI, API, and database layers
- Performed API automation using **REST Assured** and validated responses using MySQL queries
- Developed SQL queries to validate complex backend data relationships ensuring high data accuracy
- Integrated automated test suites into **AWS-based CI/CD pipelines** for continuous testing
- Executed daily regression, smoke, and sanity test suites as part of release cycles
- Collaborated with developers for debugging, log analysis, and root cause identification
- Monitored production systems using **Datadog** for proactive issue detection
- Improved test stability by reducing flaky test cases and enhancing reliability
- Leveraged **Claude AI** for generating test cases, improving test coverage, and reducing manual effort
- Utilized AI-assisted tools for automation script development and code optimization
- Integrated AI-based workflows for faster test design and maintenance of automation repositories

KreditBee

Nov 2022 – Mar 2024

Test Engineer

- Built Selenium WebDriver automation framework from scratch using **Java**
- Increased automation coverage and reduced regression testing effort by **40%**
- Performed API testing using **Postman** and validated responses using SQL queries
- Executed functional, regression, and cross-browser testing
- Created and maintained test cases, test scenarios, and test plans
- Participated in Agile ceremonies, including sprint planning and requirement analysis
- Managed defect lifecycle using **Jira** and ensured timely resolution
- Collaborated with cross-functional teams to ensure stable and high-quality releases

Key Achievements

- Awarded **Star Performer** for multiple times for outstanding contribution and performance
- Successfully migrated automation framework from **Cypress to Playwright**, improving execution efficiency
- Reduced regression cycle time by **40%** through automation and API validation
- Ensured high data accuracy in healthcare systems through backend validation
- Improved overall test reliability by reducing flaky test cases

Education

B.Tech – Electrical and Electronics Engineering

NM Institute of Engineering and Technology, Bhubaneswar

2022
